Installation Instructions

Unlike other fixtures which require more than two people to install, our IMB (Intelligent Mounting Bracket) helps you to save time and money.

With its light, small and user friendly bracket, you can install this fixture easily with only one person. Meanwhile, you can check the leveling by using the integrated level bubble on the mounting bracket.

A
Uninstall the mounting bracket from fixture base plate by unscrewing the 2 hex socket studs.

Leveling Device

B
Remove the mounting bracket.

Leveling Device

C
Level the bracket to intended height, install the bracket on the wall.

D
Lift the fixture up and tilt slightly toward the wall mounted bracket as shown in figure D, hook the fixture base plate with the mounting bracket.

E
Tighten screws.
